Logikseminariet Stockholm–Uppsala

Ieke Moerdijk

Dendroidal sets

I will discuss a particular example of a presheaf topos, based on a category of finite trees. This presheaf topos is closely related to the theory of operads or multi-categories (close to algebraic theories and to linear logic), and to weak higher categories (presumably needed for modelling intentional type theories).

Onsdag 26 april kl. 10.30–12.15,
sal 3513, MIC,
Polacksbacken, Uppsala.
