Logikseminariet

Logikseminariet arrangeras i samarbete med Stockholms universitet.
Ansvariga: Per Martin-Löf och Viggo Stoltenberg-Hansen

PER MARTIN-LÖF, *Assignment calculus.* (2, 9, 16, 30 sept)

DAVID SUNDGREN, *On sums of ordinal numbers and their order types* (redovisning av examensarbete). (23 sept)

JOHN V. TUCKER, *Computability theory on algebras of streams.* (7 okt)

ERIK PALMGREN, *Non-archimedian theories of arithmetic with applications, I and II.* (21, 28 okt)

ED GRIFFOR, *On the existence of C-equilibria.* (25 nov)

PETER DYBJER, *Normalization proofs and normalization algorithms.* (2 dec)

ERIK PALMGREN, *Non-standard models of constraint logic programs.* (16 dec)

MICHIEL VAN LAMBALGEN, *Analogies between random and lawless sequences.* (31 mars)

ERIK PALMGREN, *Extending Bishop-constructivism with nonstandard objects.* (14 apr)

DAG WESTERSTÅHL, *Definability of generalized quantifiers on finite structures.* (21 apr)

IEKE MOERDIJK, *A model for constructive nonstandard arithmetic.* (28 apr)
